Computer Science master's student with hands-on experience building full-stack web and native Android applications using React.js, Kotlin, FastAPI, and Spring Boot. Skilled in delivering complete software products end-to-end from intuitive UI and robust REST APIs to automated CI/CD deployment with Docker. Proven track record delivering production platforms for campus organizations, indie mobile apps, and freelance clients.

Education

Expected in 2027-08

Master of Science: Computer Science

Mahidol University, Thailand

Graduated in 2025-02

Bachelor of Science: Computer System Engineering

University of Sunderland, United Kingdom

Skills

Programming Languages: Java, Kotlin, Python, JavaScript, TypeScript, Dart, SQL

Frontend Development: React.js, HTML, CSS, Tailwind CSS, Bootstrap

Backend Development: FastAPI, Express.js, Spring Boot, RESTful APIs

Mobile Development: Android (Kotlin), Jetpack Compose, Flutter, MVVM, Clean Architecture

DevOps: Docker, Linux (Ubuntu), Nginx, GitHub Actions (CI/CD), DigitalOcean

Data science: Pandas, NumPy, Scikit-learn, Data Visualization, Statistical Analysis, Machine Learning

Experience

2025-02 to current

Freelance Software Developer

Self-employed

- Developed web platforms for university initiatives and student sports clubs, integrating booking, payment workflows, and tournament management.
- Architected and published indie Android applications with Kotlin and Jetpack Compose, featuring offline-first storage and cloud sync.
- Configured CI/CD pipelines using GitHub Actions, Docker, and Nginx on Ubuntu servers to automate testing, build, and production deployments.

Projects

1. Bangkok Transit - Public Railway Transportation Platform

- Developed responsive UI for map-based railway navigation and trip planning platform
- Integrated frontend components with backend APIs to display routes and station information.
- https://bangkoktransit.onrender.com

2. Court Connect - Mahidol badminton club management system

- Integrated frontend components with backend APIs to support court bookings, player sessions, wallet payments, and payment proof submission
- Collaborated on LINE integration, and backend API workflows for smoother player and organizer experiences.
- https://cconnect.tspdigital.solutions

3. GradMUSU - Graduate Student Union Event Platform | Mahidol University

- Developed a platform for graduate students to manage profiles, register for events, join waitlists, and check in using QR codes.
- Built organizer and admin workflows for event management, conditional registration forms, and post-event evaluations.

4. Suit Case - Travel item list checking android app

- Developed an Android app for creating and managing trip-based packing lists and
- Implemented login, cloud sync, photo uploads, swipe actions, and shake-to-pack interaction.
- https://github.com/pyaestk/Suit-Case

5. Student Performance Analysis Using Machine Learning & Statistical Testing

- Analyzed student laboratory and examination performance to identify factors influencing academic outcomes.
- Developed machine learning models to predict student performance and evaluate key predictors
- Visualized trends and insights to support data-driven educational decision-making.

6. Line Follower Autonomous Garbage Truck

- Led development of an IoT-enabled robotic waste collection system.
- Implemented line-following navigation, obstacle detection, and automated waste collection
- Enabled remote monitoring and control through the Blynk platform.
- https://youtu.be/Z_S7mKZLvr8?si=AIdOmpmII5uHrAkM&t=96

Certifications

- Android App Development with Kotlin - Udemy
- Create REST APIs with Spring and Java - Codecademy
- CS50's Introduction to Computer Science - CS50: Harvard University
- Exploring Networking with Cisco Packet Tracer
- Learn CI/CD with GitHub Actions, Docker and Go Course - Boot.dev

Language Skills

English - Full Professional

Burmese - Native or Bilingual

Thai - Elementary
